EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with T. Daniel Christenbury on 6/5/07.

The application has been amended as follows:

In the claims:

Please cancel claim 12

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a method for producing an electrochemical element in the form of a button cell, wherein the housing of the button cell is sealed during formation of the element and then once the element has been formed the seal is intentionally broken open to vent gases from the housing of the button cell and then the housing of the button cell is resealed. The prior art does allow for venting batteries in general however said venting occurs during the operation of the battery to vent the gases that form during normal use not during production.

Furthermore batteries during production are not sealed and there is no motivation for a person having ordinary skill in the art to modify any prior art reference to seal a battery during the production process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

Applicant's election without traverse of claims 8-12 in the reply filed on 5/4/07 is acknowledged.

This application is in condition for allowance except for the presence of claims 1-7 directed to an invention non-elected without traverse. Accordingly, claims 1-7 have been cancelled.
